	Title	Abstract
1	Method and system for processing electrocardiograms	
2	Method, system, and program for an improved enterprise spatial system	
3	Method and system for communicating data to and from network security devices	
4	Method and apparatus for sociological data mining	
5	Man machine interface for power management control systems	
6	Methods and apparatus for using the internet domain name system to disseminate product information	
7	Method and system for modifying and transmitting data between a portable computer and a network	
8	Virtual human interface for conducting surveys	
9	System and method for intelligent caching and refresh of dynamically generated and static web content	
10	Telephone office service assist and handoff	
11	Method for customer definable telephone capability
